

Dear Neighbours,

Welcome to our fourteenth newsletter for the redevelopment of 250 City Road (formerly City Forum).

Residents Meeting

This is just a gentle reminder that the next Residents Meeting will be held on:

Thursday 25th Feb 16
at St Luke's Community Centre
In the Garden Room.

The site team will be available to discuss any issues or answer any questions you may have regarding our Development between 16:30 – 18:00

Hello from the Site Team,

Since our last newsletter a lot of progress has been made on site. We are now starting to construct the basement and ground floor slabs for the blocks. Below are a few pictures that show the process involved in doing this.

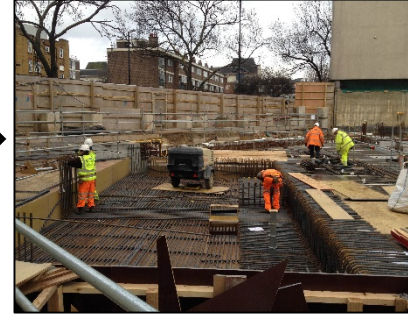

Current Site Activities

The image above shows the construction of the basement slab. The piles are broken down to the required level and then reinforced steel bars are fixed to create a platform which is then concreted.

The image above shows the columns from basement to ground floor being formed. Formwork is erected around the reinforced bar and are poured to form the columns.

Once the columns have been formed a temporary decking system is installed to allow for the rebar to be fixed to form the ground floor slab.

The image on the left shows the ground floor slab having been poured. The slab is poured in sections and is joined together to form one continuous ground floor slab. We will be repeating this process across all the Blocks in phase 1.

250 CITY ROAD COMMUNITY WEBSITE

We are in the final stages of completing our 250 City Road community website. The purpose of this website is to provide you with up to date information as the construction progresses. It will give you access to our time lapse photos and information regarding upcoming works that may affect you.

Please get in touch if you have any questions or queries about our development on:
